Address: Peru

Full Stack Developer with 2 years of experience building web applications with Next.js, TypeScript and Node.js. Skills in React.js, Express.js, HTML5, CSS (incl. Tailwind CSS), RESTful API (Postman) and MySQL database management. Teamwork and effective technical communication.

Objectives: Grow in new technologies, challenging projects and innovative solutions.

WORK EXPERIENCE

Full Stack Developer

January 2024 - Present

As a Full Stack Developer at Diurvan Consultores, I handle client requirements for their web applications, covering front-end and back-end. My day-to-day includes reviewing tasks, participating in meetings, and contributing ideas to solve problems. I use TypeScript, React.js, and JavaScript for the front-end, and Express.js and JWT to build APIs. I manage MySQL databases and use Postman for API integration.

I work with CSS and Tailwind CSS, ensuring an optimal user experience. I participate in projects from conception to delivery, collaborating with multidisciplinary teams and using agile methodologies. For deployment, I use Render, AWS, Railway and Vercel, and Git and GitHub for version control, facilitating collaboration within the team.

ACADEMIC TRAINING

- Systems Engineering
- Universidad Nacional del Santa 2020-2025

COURSES

- Self-taught training: Html, Css, JavaScript, React, TypeScript, Next.js, Tailwind, Node.js, Express.

SKILLS

- | | | |
|------------|--------------|--------------|
| • HTML | • JavaScript | • Next.js |
| • CSS | • Node.js | • TypeScript |
| • Tailwind | • Express.js | • Postman |
| • React | • MySQL | • Ingles |
